

ANA GUERREIRO

DEVELOPER

ABOUT

Hello, I'm Ana. Computers have always been part of my life, but I only recently considered pursuing programming as a career. After six years in sales in commerce, I found a passion for coding and have been actively improving my skills. Now, I'm eager to apply my programming abilities in a company that values learning and professional growth. I'm excited about contributing and expanding my experience in this field.
