## ABOUT ME

I'm a developer with experience in front-end and back-end technologies, including Kotlin, Angular, and Python.

After six years in commerce, I transitioned to tech and recently developed a mobile app for a smart kitchen project.

I'm eager to apply my skills, solve challenges, and continue learning in dynamic environments.

## PROFESSIONAL EXPERIENCE

### MC Sonae - Bit

Customer Delivery - Developer Intern

2024

Joined the Yammi project, a smart kitchen machine developed with Kotlin and PHP, during its migration phase.

- Created a Python tool for log filtering, improving analysis efficiency.
- Implemented remote debugging in a recipe update script to resolve recurring issues.
- Managed Linux servers across different environments, manually applying updates.
- Independently developed a mobile app using Ionic and Angular for remote control of the Yammi, integrating MQTT communication

## EDUCATION

### Cesae Digital

Software Development

2024

### SheCodes

Front-end Development

2023

### IEFP

Data analysis

2023-2024

UX/UI Design

2023

Introduction to Python

2022
